

Site Construction & Development

Nuna offers a complete turnkey package for mine site planning and development. Delivering on time, on budget and beyond expectations, we handle everything from access roads, water containment structures, tailings management facilities, airstrips, laydown areas, diversion channels, camp pad facilities, pre-stripping, contract mining, site grading, and closure activities.

From mobilization and re-supply logistics to the integration of project engineering, construction, and operation, you can depend on Nuna.
